

A SHARED COMMITMENT TO SUSTAINABLE WINES AND SPIRITS

Opici Wines & Spirits proudly partners with wineries and distilleries that prioritize environmentally and socially responsible practices. Our thoughtfully curated portfolio highlights producers committed to sustainability and meaningful investments in preserving the land. These selections reflect values that benefit both the planet and the people who enjoy great wines and spirits.

OUR BRANDS AND THEIR CERTIFICATIONS

INTERNATIONAL

ISO 45001: An international standard that helps organizations establish, implement, and maintain an effective Occupational Health and Safety Management System, prioritizing a safer working environment through leadership commitment, worker participation, and effective communication.

ISO 14001: An internationally recognized standard that provides a framework for organizations to establish, implement, and improve an effective environmental management system to enhance performance and compliance.

FAIR TRADE CERTIFICATION: Ensures that products are produced in a way that benefits farmers and workers in developing countries, guaranteeing fair wages, safe working conditions, and environmental sustainability, thereby supporting a more equitable global trade system.

SAI 8000: Ensures social accountability in the workplace by adhering to international human rights norms and national labor laws to promote ethical treatment of workers across various industries and supply chains.

ECOCERT: Certifies farms for organic and sustainable practices, ensuring environmental sustainability, social responsibility, and high-quality products free of synthetic chemicals, and is recognized by the USDA as an organic certification body.

B.V.: A global service providing testing, inspection, and certification for various sectors, including agriculture, energy, and infrastructure, focused on sustainability to help organizations improve performance, manage risk, and ensure compliance with industry and country-specific standards.

B CORP CERTIFICATION: An international designation granted to companies that meet high standards of social and environmental performance, accountability, and transparency.

CLIMATEPARTNER CERTIFICATION: Given to companies that measure, reduce, and offset their carbon emissions to achieve climate neutrality. It shows a business's commitment to sustainability and environmental responsibility.

ARGENTINA

THE BODEGAS DE ARGENTINA: An internationally recognized program that promotes sustainable practices in the Argentinian wine industry, covering environmental, social, and economic concepts and involving evaluation, implementation, and independent audits, supported by educational materials from academic and governmental institutions.

VEGAN ARGENTINA Established in 2019 by LIAF Control, an Argentinian company specializing in inspection and certification services for the agricultural sector, this certification process ensures the origin of raw materials, additives, and adjuvants are free from animal sources.

CHILE

THE CHILEAN WINE SUSTAINABILITY CODE: The program guides wineries on sustainable practices across vineyard management, winery production, and social responsibility, involving rigorous assessments, necessary improvements, and audits, allowing certified wineries to use the seal for marketing and demonstrating commitment to sustainability.

ASOCIACION VITICULTURA REGENERATIVA: Established in 2021, this organization focuses on transforming vineyard management through carbon cycle-based regenerative agriculture, enhancing soil health, biodiversity, and climate resilience, and serving as a hub for holistic farming knowledge and collaboration.

FRANCE

L'AGENCE BIO: French government agency responsible for certifying and regulating organic products, promoting their benefits, supporting producers' transition to organic farming, and encouraging consumption through campaigns, playing a crucial role in advancing sustainability in France.

LIVING SOILS: An initiative aimed at regenerative agriculture to naturally improve soil health, enhance crop productivity, and support biodiversity through sustainable farm management, fostering collaboration among farmers, agri-food companies, scientists, and policymakers for resilient agricultural systems.

THE HVE (HIGH ENVIRONMENTAL VALUE): Certification, developed by the French Ministry of Agriculture, recognizes agricultural systems implementing sustainable practices like biodiversity conservation, fertilizer and water management, and sustainable pest control, with three levels indicating the stringency of environmental practices.

ITALY

VALORITALIA: Authorized by the Italian Ministry of Agriculture, Food Sovereignty, and Forestry (MiPAAF), certifies sustainable processes in wine, olives, and other food of origin, including organic farming, sustainable agriculture, and product authenticity, ensuring wines meet Equalitas, VIVA, and SQNPI standards.

EQUALITAS: A sustainability certification standard for the Italian wine industry, emphasizing social, environmental, and economic sustainability, requiring an environmental management system, a sustainability report, and annual audits by authorized bodies like Valoritalia to ensure transparency and improvements across the supply chain.

THE NATIONAL QUALITY SYSTEM FOR INTEGRATED PRODUCTION (SQNPI): Italian certification system by the Ministry of Agriculture (MiPAAF) that promotes sustainable agricultural practices with minimal synthetic chemicals, environmentally friendly methods, integrated crop management, and flexibility across regions, becoming a significant agricultural standard.

VIVA: A program by the Italian Ministry of the Environment and Energy Security, promotes sustainability and viticulture improvement through tailored regional programs, focusing on the socio-environmental footprint of wineries and the supply chain.

NEW ZEALAND

NEW ZEALAND SUSTAINABLE WINEGROWING:

The certification program focuses on climate change, water, waste, plant production, soil, and people, with 96% of New Zealand's vineyard area and 90% of wine production certified, requiring compliance for export and regular independent audits to ensure adherence to evolving sustainability standards.

SPAIN

THE WINERIES FOR CLIMATE PROTECTION:

The WfCP certification framework, developed by the FEV, promotes environmental sustainability in the Spanish wine industry by requiring wineries to meet criteria for reducing greenhouse gas emissions, improving energy efficiency, managing water resources, and minimizing waste, with compliance ensured through independent audits.

UNITED STATES

THE CERTIFIED CALIFORNIA SUSTAINABLE VINEYARD & WINERY:

The program by the CSWA promotes sustainable practices in the wine industry with over 200 best practices, rigorous evaluations, and continuous improvement, enhancing marketability and supporting the long-term health of the environment and communities, with a significant portion of California's wine industry certified.

SALMON SAFE:

A certification program in the Pacific Northwest that promotes environmentally responsible practices across various sectors to protect watersheds and native salmon habitats, requiring rigorous third-party verification and continuous monitoring.

LIVE CERTIFIED SUSTAINABLE WINERY:

Developed by the non-profit LIVE, supports environmentally and socially responsible winegrowing in the Pacific Northwest, emphasizing sustainable practices, thorough evaluations, third-party verification, and annual audits, enhancing marketability and consumer trust while promoting long-term environmental and community health.

GENERAL

ORGANIC: Organic wine is made from grapes grown without synthetic pesticides, herbicides, or fertilizers, and processed without artificial additives or chemicals.

VEGAN: Wines that are certified vegan and contain no animal byproducts.

CARBON NEUTRAL: Achieved no extra carbon dioxide released into the atmosphere by reducing emissions from production and offsetting what remains, such as by planting trees.

SUSTAINABLY FARMED: Techniques that take resource management like water and energy efficiencies into account in the vineyards and wineries.

GIVE BACK INITIATIVES: Charitable campaigns where brands connect to non-profit organizations and look to contribute based on a common philanthropic cause.
